

## PRODUCT INFORMATION SHEET

**Product Name: BACK RUBBER OIL**

### PRODUCT

Bimrose Cattle Rub is a complex mixture of Paraffinic and Napthenic Hydrocarbons that when applied along the vertebrae and head area of cattle forms a barrier or film that is impenetrable to Buffalo Fly.

There are no toxic or harmful chemical additives in this product and will not contaminate livestock that are ready for food processing.

### APPLICATION

Cattle Rub can be applied by brushing spraying or applying to the many available cattle rub systems available on the market. Insecticides may be added to this product, however you should research thoroughly the chemical composition and the effectiveness of the product before choosing to do so.

### CONTAINER SIZES

205 Litres,

20 Litres.
